

How do I turn on my Television which was connected to the HD Cable box by your technician?

This lesson is going to explain how you would easily turn on a HDTV. This television is connected to an HD cable box and a Wii Game Console. The television is over in the corner of the room next to a window which causes a great deal of glare on the screen. The user should assume that the cable box is connected and working properly.

Step 1: Check to make sure that the television power cord is plugged into the wall.

Step 2: Check to see if the cable box is connected properly and plugged into the wall.

Step 3: Look at the right side of the television.

Step 4: Turn on the television by pushing the 'Power' button.

Step 5: Take the cable remote and turn on the HD cable box.

1. Push the button marked 'Cable'.
2. Push the button marked 'Power'.

Step 6: Enjoy your television.
